## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent Number (USPN) 6,028,147 to Ogawa et al. (hereinafter 'Ogawa').

Ogawa discloses a process for forming a block copolymer having an isobutylene-based polymer block and a vinyl-aromatic hydrocarbon-based polymer block, wherein the process comprises polymerization of a functional group containing monomer in the presence of a Lewis acid catalyst, and wherein the block copolymer can contain chlorine atoms. (Abstract; col. 2, lines 14-51; col. 3, line 41 to col. 4, line 36; col. 4, lines 39-57; col. 5, lines 50-60; claim 2) The Lewis acid catalyst can be, e.g., aluminum dichloride or trichloride. (Col. 8, lines 25-41) Other additives can be added to the composition including calcium carbonate and other reinforcing agents; magnesium stearate or other stabilizer; alkali metal salt compounds; and gel-prevention compounds, such as hydrotalcite-based compounds). (Col. 11, line 62 to col. 12, line 24; See, page

14, lines 21-25 of the present specification disclosing hydrotalcite as the preferred double salt of magnesium and aluminum for the instant claimed invention)

Thus, the claims are anticipated by Ogawa.
